Data Analyst

Job Overview:
We are looking for a skilled freelance Data Analyst to transform raw data into actionable insights to drive business growth. The ideal candidate will take messy, disparate datasets, clean and process them, and build intuitive dashboards or reports to help our leadership team make informed decisions.
Core Responsibilities:
Data Collection & Cleaning: Collect data from various sources (CSV, SQL databases, APIs) and perform data cleansing to ensure accuracy.
Data Analysis & Modeling: Analyze complex datasets to identify trends, patterns, and correlations.
Data Visualization & Reporting: Create interactive dashboards in Power BI/Tableau or automated reports in Excel/Google Sheets to track key performance indicators (KPIs).
Insights Generation: Provide actionable recommendations based on analytical findings.
Process Automation: Develop automated scripts (Python/R) to streamline data evaluation processes.
Required Technical Skills & Tools:
Data Analysis: Python (pandas, NumPy), R, SQL, Excel (Pivot Tables, Macros).
Visualization: Power BI, Tableau, Looker Studio.
Database Management: SQL, MySQL, PostgreSQL, or NoSQL.
Others: Data Modeling, ETL Processes, Data Warehousing.
Qualifications:
Proven experience as a data analyst (freelance or full-time).
Strong communication skills to explain complex findings to non-technical stakeholders.
Attention to detail and accuracy.
💡 Examples of Specific Freelance Project Titles
"SQL Expert Needed: Large-Scale Data Engineering Initiative"

upwork.com/nx/job-post/instant/review?uid=2017474176019407161

Focus on Business Impact: Don't just list tools, mention how you increased revenue or reduced costs.
Define Your Niche: Position yourself as an expert in a specific area, such as "Real Estate Data Mapper" or "SaaS Churn Specialist".
